

## A Testimony of Chuck Dhuey

“It was back in the fall of 2004 that I first experienced these amazing greens. I had been involved in the nutrition industry for 15 years at that point. I had always endeavored to represent the very best products I could find and, as a consequence, had always been surrounded by the testimonies of others. As for me personally, maybe because I had been blessed with very good health, I had never experienced any tangible change in my health on any product.

When I tried these greens that all changed. For the first time I had experienced a product that had an impact on my health. I could feel the energy of this whole food coursing through my veins when I took them. I believe you will too”.

## The Integrity of our Supplier

Customers were getting results like never before. There were many testimonies being shared and the growth in the company was very product driven as a result.

Then something happened. New customers were no longer experiencing the same results. The supplier found out that the marketing company that was distributing the product was irradiating it and adding fillers. They had compromised the product to make more money. Their business was growing and still is because of the published testimonies of people who had used the product before they compromised it. Please understand that the supplier, who is also our current supplier of Caldera Greens, was making a lot of money because of the volume of sales. Yet his response to what the marketing company was doing was to walk away from his business with them completely and immediately. He did not hesitate. You can be confident that Caldera Greens is the highest quality whole food juice powder of its type and will never be compromised.

## Why Caldera Greens is the Best

Our supplier has been in business for over 30 years. They are fully integrated - they own the farm the food is grown on, they process the crops when harvested, and they package the product. They are in complete control of this high quality process from soil to bottling.

The barley, alfalfa, wheat, and oats are grown on a caldera. This is a convex volcanic crater much like Yellowstone Park. The volcanic soil on this caldera is extremely rich in minerals and fulvic acid. Fulvic acid is nature's very best natural electrolyte. All of this is evident when you experience how effective these greens are personally.

Within five hours of harvest, all of these crops are juiced and then the juice concentrate is dropped through the 100 foot tall dryers of our supplier's amazing proprietary drying process. Within 30 seconds in the dryer, 95% of the water is removed and the juice becomes a powder. All of this is accomplished at an average temperature of only 88° Fahrenheit. This is the most non-invasive, low temperature processing in the industry. I know of no other supplier that has a drying process at temperatures this low. Again, all of this happens within 5 hours of harvest.

This food is alive! All the enzymes and soil based organisms are intact. Just as I did, you will feel the difference.

## Summary of the benefits of Caldera Greens

Caldera Greens is a 'concentrated' nutritious whole food offering balanced nutrition to the body. Caldera Greens powder, like most types of vegetable powders, is very easily digested by the body, thus allowing the body to use its nutrients within a matter of minutes. It also has very strong alkalizing effects on the body. Caldera Greens as a blend of barley, alfalfa, wheat, and oat grass juice powders and a blend sea vegetation (spirulina, dulse, kelp, dunaliella salina) can supply all the nutrients which the human body needs from birth to old age. We should really waste no time in making it a regular part of our diets!

- It helps to alkalize the body.
- It helps in cell DNA repair.
- Caldera Greens acts as a free radical scavenger, reducing the amount of free radicals in the blood.
- It helps in improving skin health.
- It helps to stimulate weight loss.

## The Best Value in Whole Food Nutrition

- A great value in whole food nutrition: Only 1 level teaspoon - to get the full nutritional value, but our serving size is more than twice that much at 2½ teaspoons per day!
- Unlike some other greens products, Caldera Greens contains no Maltodextrin, which is a plus for people who are sensitive to this preservative or who suffer from conditions that affect blood sugar.
- Caldera Greens is grown on certified organic farms, and contains no additives or fillers or fibers; no artificial colors or preservatives, and no gluten. It is a 100% pure juice powder that promotes detoxification and is a rich source of anti-oxidants. The ORAC rating is over 3100 on one serving of our unflavored product!
