VelociTea

Ingredients

The VelociTEA ingredients are a special blend of safe, natural, edible herbs grown without chemical fertilizers or pesticides (even the tea bags are unbleached):

Persimmon Leaves:

Persimmon originated in China and has been grown and used for over 1000 years. The tannins and flavonoids in Persimmon leaves have anti-hypertensive, anti- carcinogenic and anti-mutagenic properties. The leaf also acts as a mild laxative, can reduce acid reflux and is an anti-hemorrhagic (stops bleeding), making it effective on hemorrhoids and varicose veins. Persimmon leaf extract is also a natural antihistamine, which will help reduce allergic reactions.

Malva Leaves:

It was used in teas in China more than five thousand years ago and employed by Greek and Roman physicians to treat internal and external disorders, calling it omniorbium, meaning "the remedy of all illnesses," It continued as an important "cure-all" treatment throughout the Middle Ages, it is principally known for its soothing qualities. Malva leave work to sooth the digestive system and work to gently stimulate the bowels.

Milk Thistle:

Has been reported to have protective effects on the liver and to greatly improve its function. It is typically used to treat liver cirrhosis, chronic hepatitis (liver inflammation), toxin-induced liver damage (including the prevention of severe liver damage from Amanita phalloides ('death cap' mushroom poisoning), and gallbladder disorders.

Marshmallow Leaves:

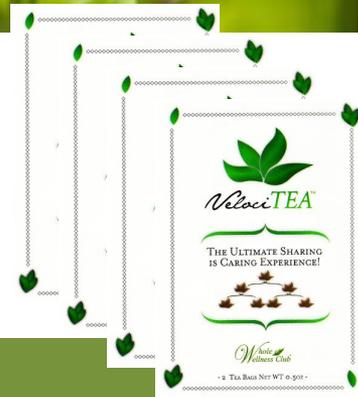

Benefits have long been acknowledged by ancient civilizations. The marshmallow is known to possess diuretic, emollient, demulcent and expectorant properties. The following are the health benefits attributed to marshmallow leaves. May aid in flushing out kidney stones and soothing the digestive system. An old time remedy used for bladder infections, digestive upsets, fluid retention, intestinal disorders, sinusitis and soar throat.

Blessed Thistle:

Considered to stimulate stomach acid secretion and has been used for the treatment of indigestion and flatulence (gas problem). Also used as an appetite stimulant, digestion enhancement, astringent, bleeding, anorexia, boils, blood purifier, breast milk stimulant, cancer, cervical dysplasia, bile flow stimulant, contraceptive, colds, diarrheas, diuretic, liver disorders, jaundice, gall bladder disorders, malaria, menstrual disorders, skin ulcers, wound healing, rabies, and yeast infection.

VelociTEA

How to Prepare

You may adjust the amount of VelociTEA you consume daily to suit your body's needs. Don't worry, it tastes good! It tastes like a regular tea or herbal tea - not like "medicine" and you can even mix it with your favorite teas.

Two bags of VelociTEA will produce one gallon.

Preparing Your VelociTEA Beverage:

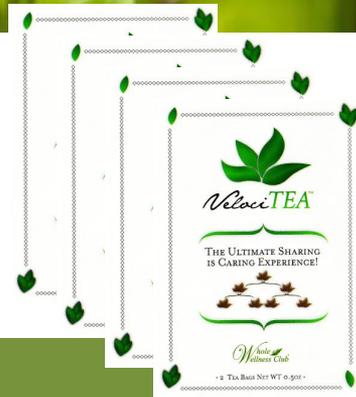

- These instructions describe how to make a 1 quart of **VelociTEA** concentrate, which when diluted with either water or other beverage of your choice, will make a total of one gallon of tea.
- Bring a quart of water to a boil, turn off the stove or take pot off the heat, add 2 tea bags once the water is no longer at a boil. (**VelociTEA** must be steeped in water which is **HOT** - close to the boiling point, but **NOT BOILING**. And **DO NOT MICROWAVE** the tea mixture. Excessive heat will destroy the important enzymes in the tea.)
- Cover the new **VelociTEA** mixture and let it sit overnight, or **let it steep for AT LEAST 4 to 6 hours** - to allow the herbs to infuse the mixture. Then, without removing the **VelociTEA** bags, pour the entire mixture into a container with an airtight lid and **refrigerate** your new batch of **VelociTEA**. **Leave the VelociTEA bags in** until you have consumed all of the liquid **VelociTEA** mixture. Then you can let them dry out, remove the edible dried herbs, and sprinkle them into various foods such as spaghetti sauce or salads.
- Now you have the concentrate that you will dilute to make your full gallon of tea. Keep the quart of tea in the fridge. Each time you drink your tea you will use 2 ounces of concentrate and 6 ounces of water or other preferred liquid (like juice or herbal tea), to make 8 ounces of tea.
- If you prefer you can make a whole gallon of tea at once, still using 2 tea bags, but this will take up more space in your fridge than if you make a concentrate from 1 quart.

DO NOT MICROWAVE the VelociTEA, either the water or tea bags!

Microwaves can destroy the natural enzymes and render some important ingredients ineffective. If you wish to drink your **VelociTEA** warm or hot, you can heat it in a saucepan or tea kettle - but do NOT heat the mixture to the boiling point, for boiling can also destroy enzymes. When using a refrigerated 1 quart concentrate, just add the 2 ounces of **VelociTEA** to 6 oz of warm water or warm tea.

VelociTEA contains natural herbs which are cathartic. Women who are pregnant or nursing, elderly persons, young children, and individuals suffering from any illness or health condition should consult with their personal physician prior to using this or any herbal supplement.

VelociTEA

Suggested Use of VelociTEA

Two-8 oz glasses of VelociTEA per day.
You can drink VelociTEA anytime during the day.

When you first begin drinking VelociTEA you might want to drink it with a meal like breakfast and dinner. But after you get used to it's detoxifying effects you can drink it whenever it suits you.

If you need to drink more or less of your VelociTEA beverage, you are free to do so. But remember that it is a *cathartic* and detoxifying tea, so it is possible to experience a little discomfort during the first few days when your body is going through the initial cleansing and elimination of accumulated toxins and old waste material.

You will likely be going to the bathroom more frequently for a few days. Don't worry, you are not going to be running to the bathroom! You will just be getting a natural urge to go more often than before - perhaps two to three times per day. And it should be natural and effortless, with no straining.

As you continue to drink your VelociTEA every day, you will be removing more and more toxins and impacted fecal matter from your colon, and **you will start to feel better and have more energy**. The more that has built up over the years, the longer it will take to clean out a larger amount. We suggest at least 3 months of drinking VelociTEA every day. Many users keep drinking it for years.

As your colon is being cleared of the material that is clogging it, **you should see your abdomen start to shrink. You will lose inches from your waist, and you will lose pounds of excess weight.**

Drink More Water!

IMPORTANT: You also need to drink at least 8 cups (64 oz.) of Clean Water daily, which is recommended for everyone every day! Not drinking enough water reduces your body's ability to get rid of wastes and toxins. It is especially important while detoxifying your body to give it lots of water to help your kidneys, sweat glands, lymphatic system, lungs, and digestive tract flush out the toxins and waste material.

Water is the "Universal Solvent" which acts as the carrier to transport nutrients into your cells and flush waste material out of your cells.
